

Austin Margarone

Software Developer

linkedin.com/in/austin-margarone | github.com/austinmargarone | austinmargarone.com

Production-focused Front-End Engineer with 5+ years shipping responsive web applications using Next.js, TypeScript, and Tailwind. Proven track record delivering real-time features and on-chain interactions for clients and startups. Interested in Web3 opportunities while open to high-impact front-end roles.

Technical Skills

- **Core Stack:** TypeScript · React · Next.js · Tailwind CSS · Redux · React Query · Zod
- **Blockchain:** Solidity · Foundry · Hardhat · ethers.js · Wagmi · Viem · Thirdweb · RainbowKit
- **Backend:** Node.js · Express · Prisma · MongoDB · PostgreSQL · REST · WebSockets
- **DevOps & Tools:** Vercel · AWS · Git/GitHub · Figma · Sanity CMS · Linux/VPS

Experience

Flower City Virtual Tours LLC | *Founder - Lead Developer*

Mar 2020 – Present (Real Estate Tech SaaS)

- Built and deployed 10+ client-facing Next.js + TypeScript web applications serving real estate brokerages across New York
- Drove 35% average increase in user engagement and 20% higher lead conversion through optimized, mobile-first UIs
- Integrated Matterport and Sanity CMS, reducing content update times by 55% via custom schemas
- Achieved 99.9% uptime and 25% faster load times using Next.js SSR/SSG with Vercel Edge Network
- Optimized server-side infrastructure with Node.js, improving application performance by 25%

Sentiment | *Full-Stack Web3 Developer*

Jun 2024 – Nov 2024 (Stealth Web3 Data Marketplace)

- Built responsive front-end for a Web3 survey platform using Next.js 14, Tailwind, and Material UI in a 5-person agile team
- Implemented secure on-chain interactions with Solidity smart contracts and ethers.js, enabling trustless data transactions
- Designed and shipped wallet connection flow (MetaMask + WalletConnect) used by thousands in internal testing
- Deployed scalable backend on AWS with Prisma; wrote optimized queries cutting response times by 40%
- Conducted code reviews and participated in security discussions alongside senior blockchain engineers

Projects

NFT Edition Drop + Mint dApp on Base

In Progress – Launching Jan 2026 | Full-Stack Developer

- Building a full-stack NFT mint site on Base using Thirdweb SDK, Foundry for contract testing, Zora protocol integration, lazy minting, and RainbowKit for wallet connectivity

Hipnode - *Social Media Platform*

Dec 2023 | Full-Stack Developer | [Live: hipnode-social.vercel.app/home](https://live.hipnode-social.vercel.app/home)

- Led a team of four developers to build a general social media platform as a capstone project using Next.js, TypeScript, Tailwind CSS, and MongoDB
- Developed responsive web application from Figma designs, achieving 25% faster page load times through Next.js 13 SSR and SSG
- Implemented secure user authentication with Next.js Auth and cookie-based session management
- Integrated WebSockets for real-time messaging and online status, increasing user engagement by 35%

Empower Realty Group - *Brokerage Website*

Jan 2025 | Full-Stack Developer | [Live: empowerrealtygroupllc.com](https://live.empowerrealtygroupllc.com)

- Developed high-performance portfolio website using Next.js and TypeScript with Sanity CMS integration for real-time property listing updates
- Reduced page load times by 20% and achieved Lighthouse performance scores of 95+
- Designed custom CMS workflows that cut property update time from hours to under 5 minutes

Education and Certifications

- JSM Masterclass – Full-Stack Bootcamp | Apr 2023 – Dec 2023
- CodeCademy – Front End Career Path | Jan 2022 – Apr 2023
- Patrick Collins – Solidity, Smart Contracts, and Blockchain | Jan 2022 – Apr 2023
- Alfred State College - SUNY College of Technology | Aug 2012 – May 2014
